End to End Software Development

AUTORENTZ

SMARTWCM

Introduction

01 Experts

Experts in IT consulting, software development, testing and user interface design.

We offer world-class services through agile or traditional methodologies by relying on the most talented pool of engineers from around the world. We work on projects of diverse complexity, ranging from simple information systems and web sites to complex enterprise type architectures, web-enabled applications, traditional n-tier and service oriented architectures.

Our Services include Quality Assurance, Web Design and Marketing, Cloud Computing Services, Alfresco Development Services and Liferay Development. We also provide innovative products such as Meta Tag and Keyword Analyzer, Web Content Management System, Smartwcm, Sitepm and AutoRentz.

02 Values

Our core values are:

- ▶ Dedication and passion for excellence
- ▶ Integrity and Honesty
- ▶ Care about our colleagues and their quality of life
- ▶ Talent retention and continuous motivation
- ▶ Creativity and Innovation
- ▶ Collaboration and Respect
- ▶ Diversity
- ▶ Desire to share knowledge, achievements, and experiences

03 Mission Statement

To help our clients make distinctive improvements by leveraging our experience in application development and to build a great firm that is profitable and appeals to, helps develop and retains exceptional people.

AutoRentz

Autorentz is a completely dynamic product, powerful enough to aid all kinds of automobile rental companies to design their own websites and control their reservations with its effectively constructed backend. The powerful backend allows the administrators to control all the reservations flowing in through their websites and also allows them to make or cancel any reservations from these backend.

Autorentz comes with highly adaptable features allowing the administrator to easily add a vehicle or modify an existing vehicle details and add a location or modify an existing location. It also comes with a highly secure PayPal payment gateway that can be dynamically configured through the backend.

This platform is easy and quick to implement. It will allow you to automate processes and give you more time to focus on your core duties.

Autorentz is the best car rental software solution.

RENTAL FEATURES

Autorentz comes with highly flexible features. Some of these features are mentioned below.

The screenshot shows a 'Checkout' page with the following sections:

- Booking details:** Includes 'Time and place' (Change), 'Pick-up' (Jun 15, 2016, 8:00:00 PM, 560 Zenith Drive, Glenview), 'Return' (Jun 16, 2016, 8:00:00 PM, 435 Murphy Rd (inside Alamo Travels), Stafford), and 'Rental Duration' (1 day).
- Personal Details:** Includes 'First Name' (Gary), 'Last Name' (Hanks), 'Email Address' (gary.hanks@gmail.com), and 'Phone Number' (456.7411594). There is a checkbox for 'I have read the rental agreement and agree to the terms and conditions.'
- Payment Options:** Includes 'Selected Vehicle' (Mercedes-Benz), 'PayPal', 'Cash', and 'Cheque'. There is also a checkbox for 'I'm not a robot' and a 'Payment Options' button.

Managing Vehicles

Options to add new vehicles and modify existing vehicles easily through our powerful backend.

Pick Up and Drop Off Locations

Options to add and change locations.

Payment Options

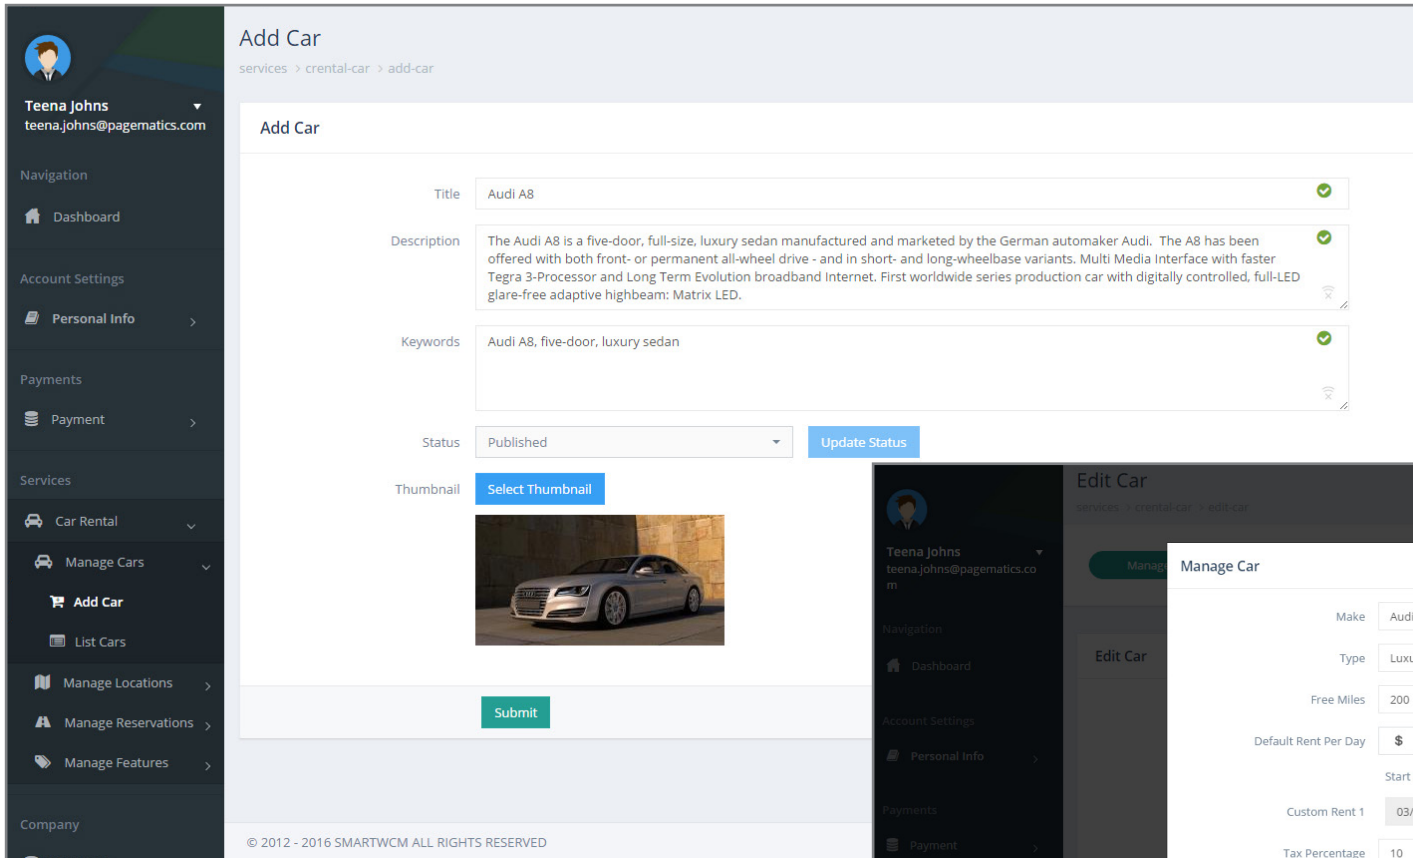

Confirm and cancel reservations and receive payments online using Paypal.

Email Notifications

Receive instant email notifications for all confirmed and non-confirmed reservations.

Back End

1. Add/Edit Vehicle

Once logged in administrators can add and edit vehicles in the back end.

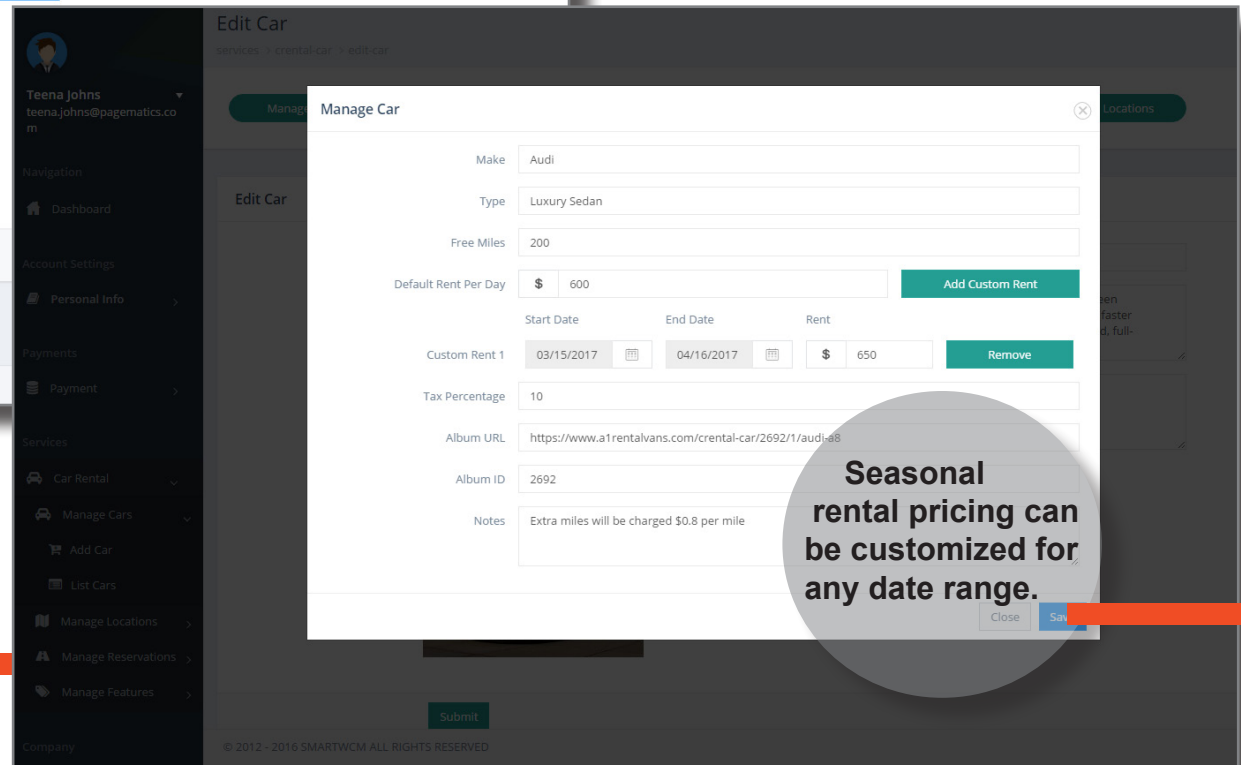

Users can:

1. Make reservations by specifying the pickup date and time
2. Search for pick and drop locations

2. Manage Details of a Vehicle

To provide the customer with more information about the Vehicle, the manage car tab enables the administrator to update the extra details associated with a vehicle such as:

1. Vehicle type
2. Vehicle make
3. Rent per day
4. Tax percentage

Seasonal rental pricing can be customized for any date range.

3. Manage Extra Features for a Vehicle

Administrators can manage and create extra features to any of the added vehicles. These features can be selected during the checkout by the customer.

The screenshot displays a multi-step process for managing extra features for a vehicle. It includes a sidebar with navigation options like 'Dashboard', 'Personal Info', and 'Manage Features'. The main content area shows a 'Manage Features for a Car' window with a table of existing features and a 'Select Extra Features' window with a grid of feature cards. An orange 'Choose Extra Features' overlay is also visible, showing a summary of selected features and booking details.

10. List Locations

There is an option to edit or delete a location from the list of locations.

In the front end customers can view all the locations that have been added to the backend.

Front End

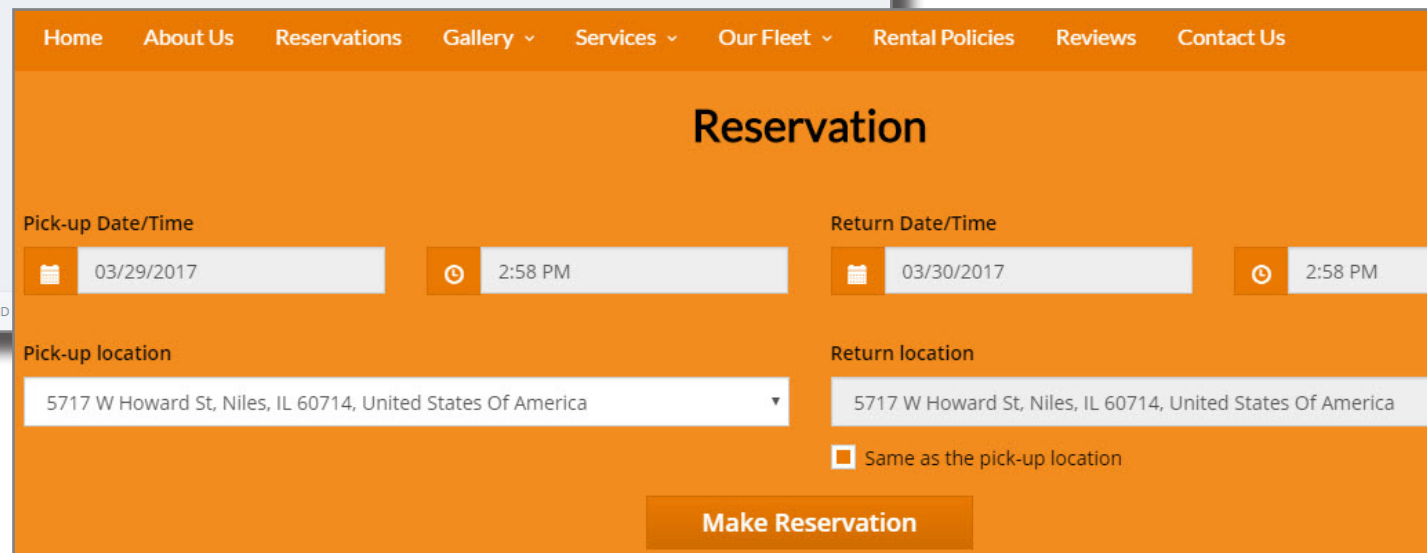

11. Add Reservations

Add reservation section provides the option to reserve a vehicle for the selected days.

Reserving a vehicle has the following steps:

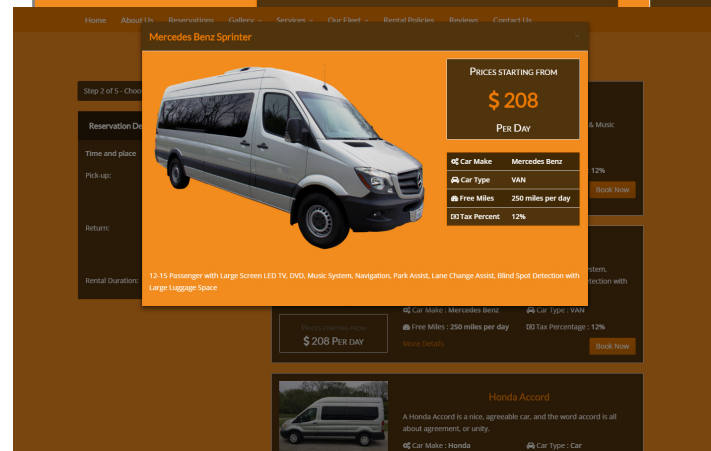

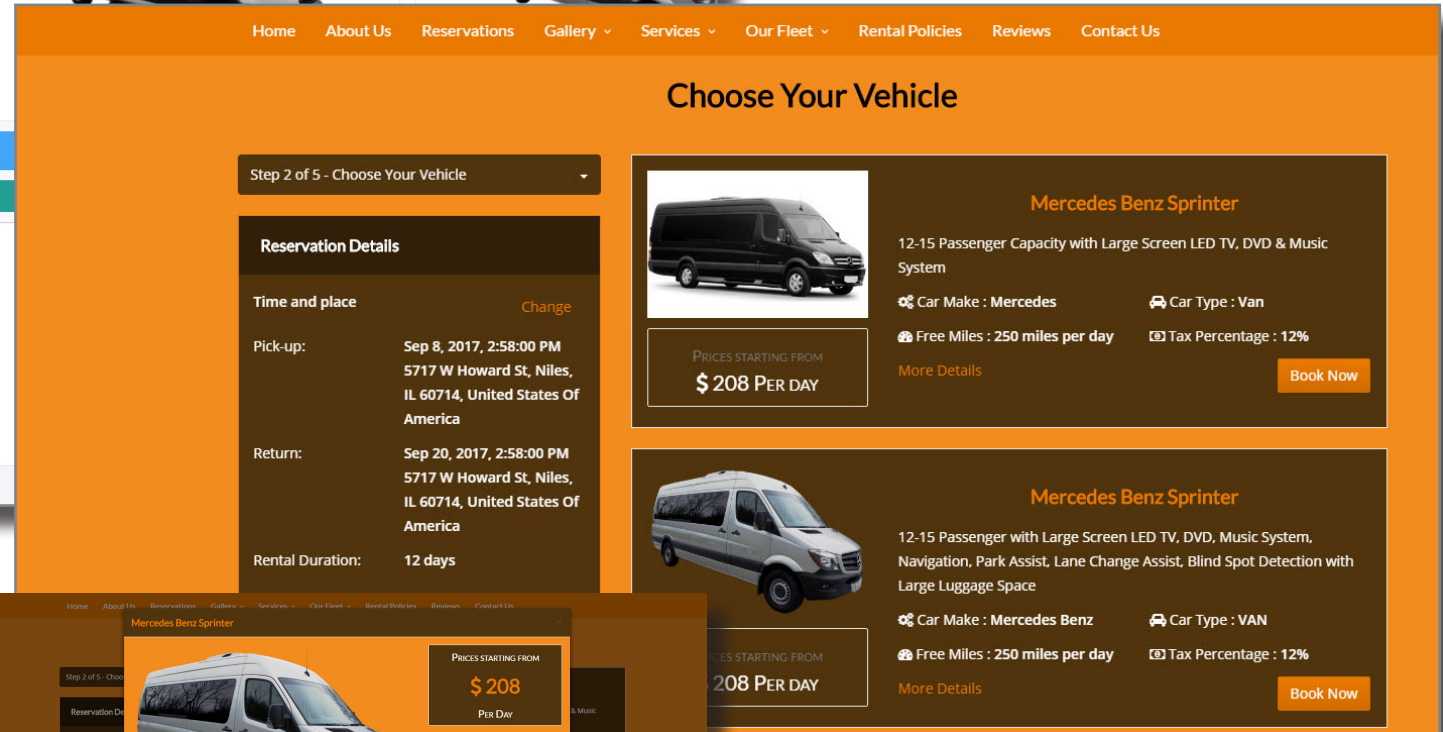

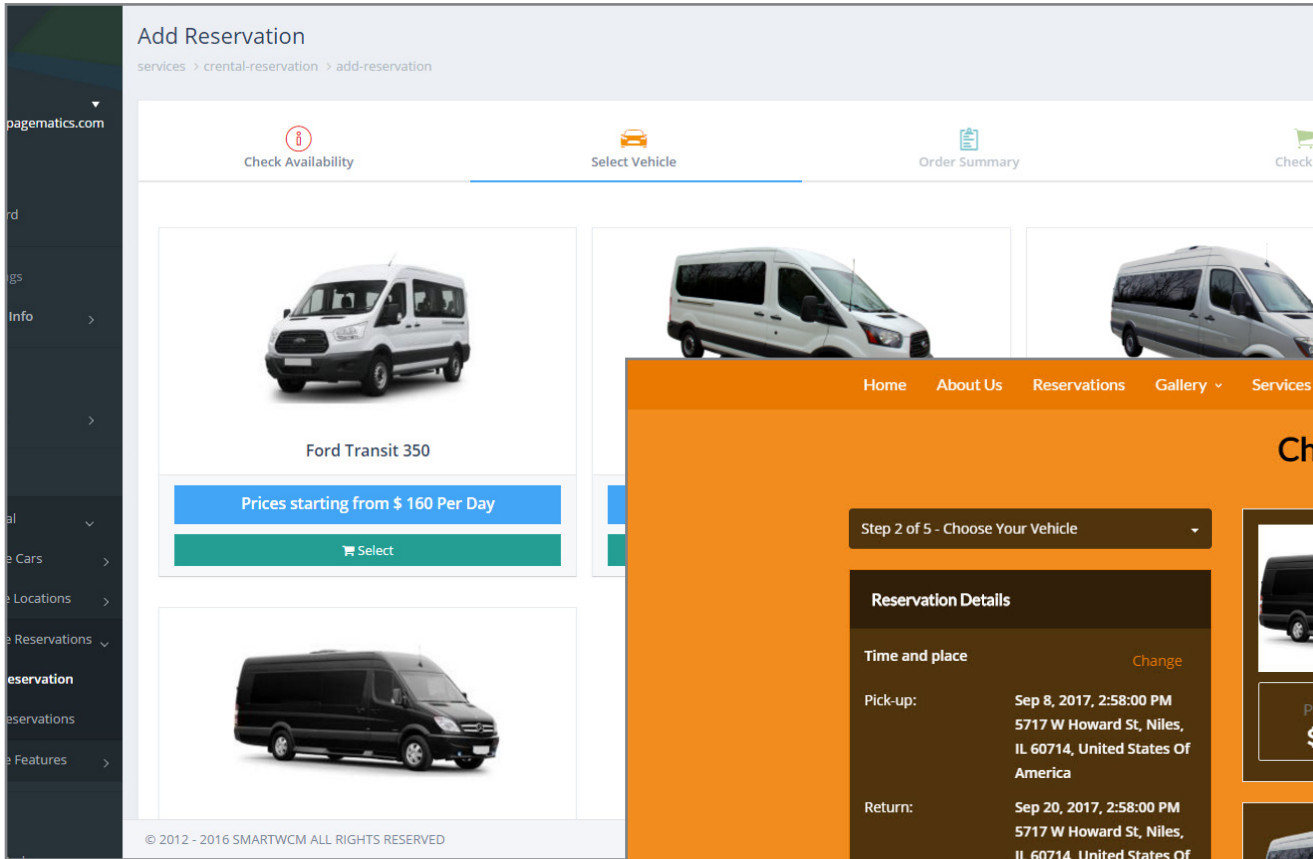

A. Enter Reservation Search Data

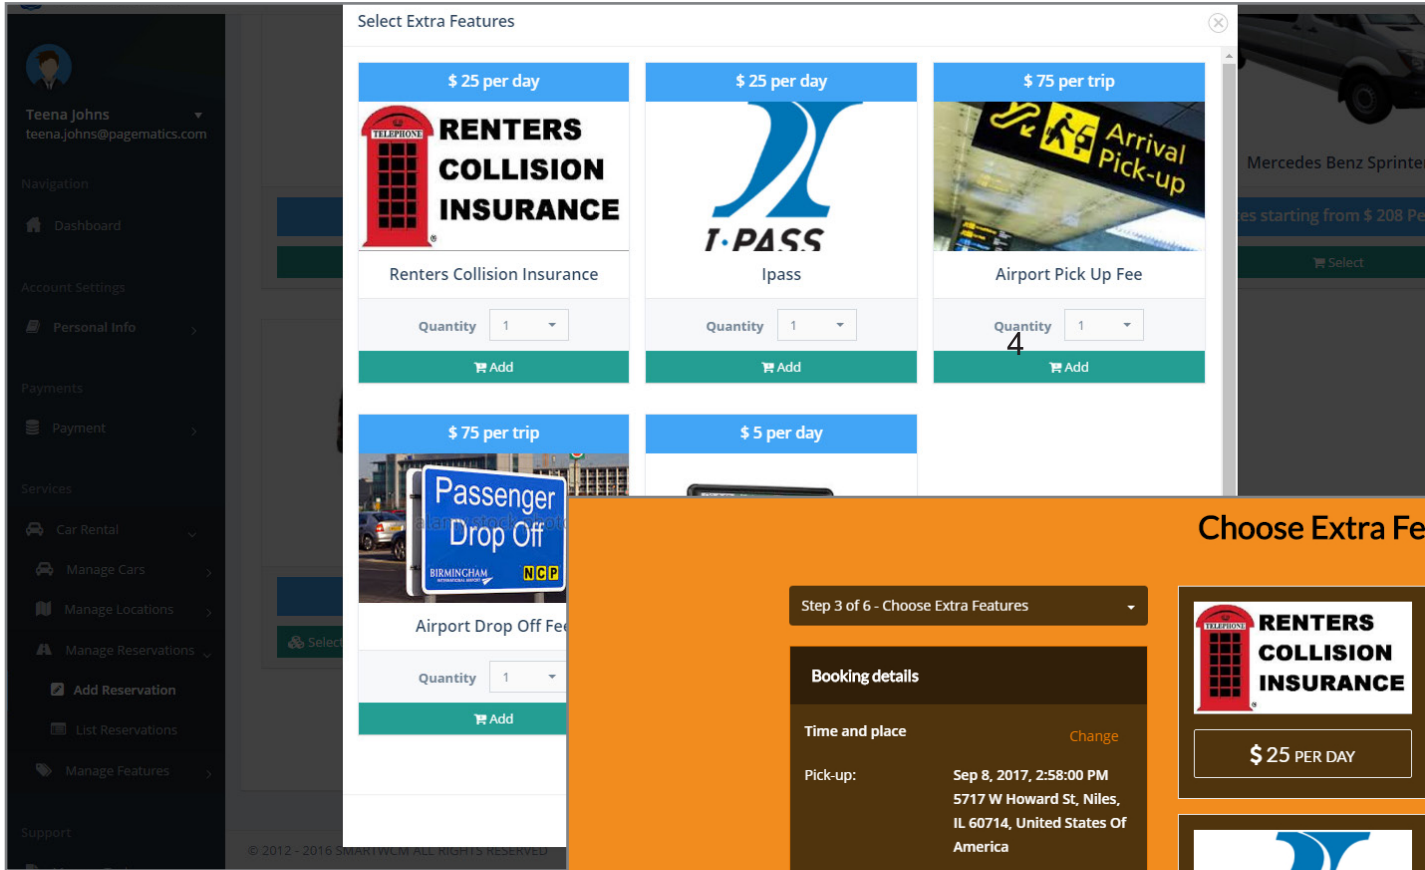

Here a customer can search for the available vehicles by selecting the required pick up and drop off dates and locations.

B. Select Vehicle

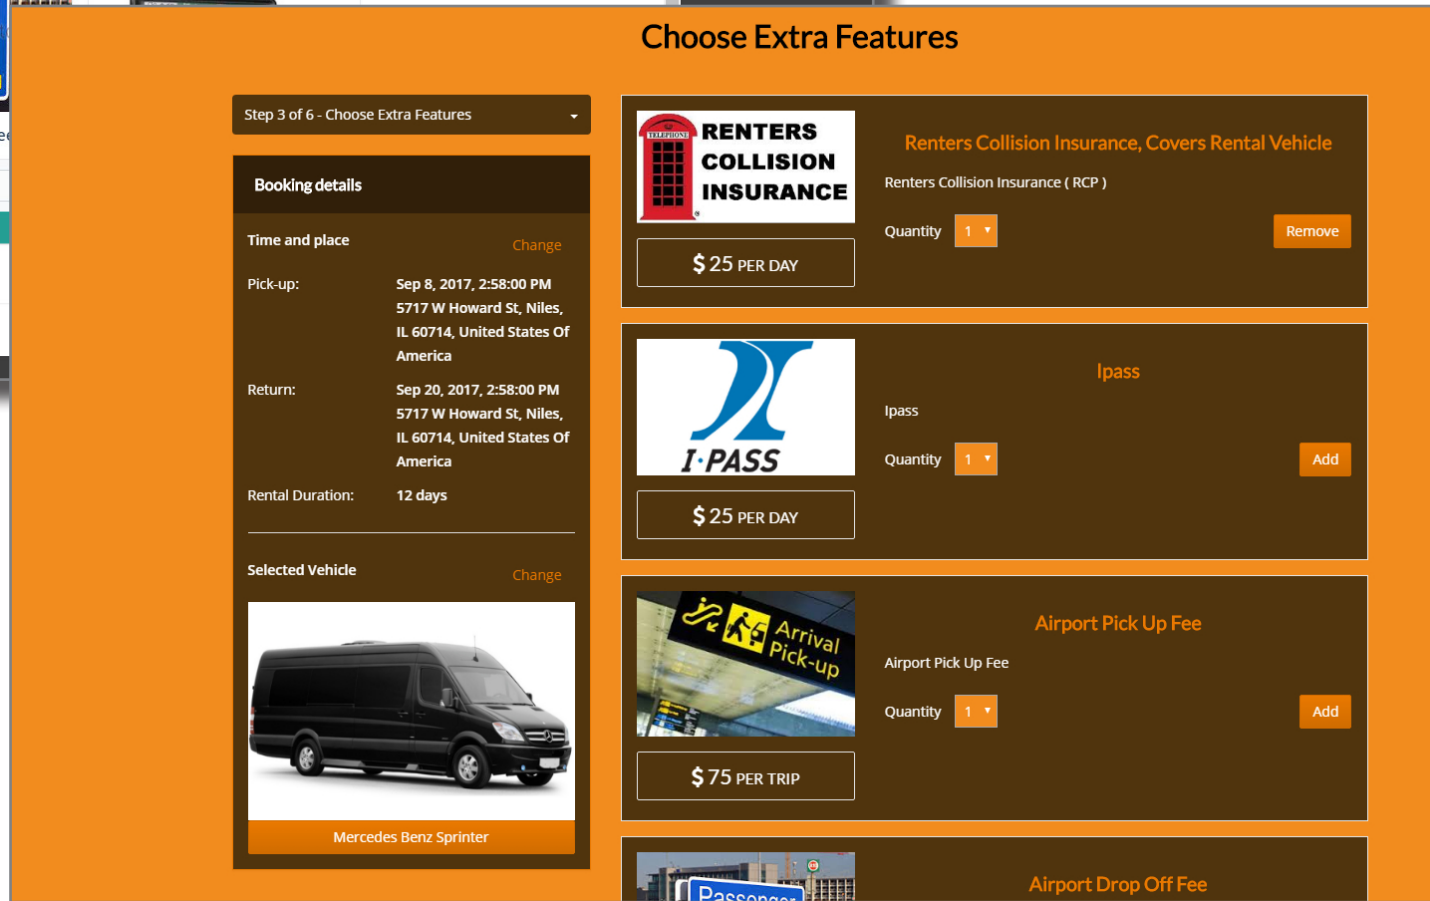

Once the list of all available vehicles appears, the customer can select the required vehicle to proceed to checkout.

C. Select Extra Features

Here the customer can select any extra features if there is any available for the selected vehicle.
